

# Even *if* *it* ISN'T *broken,* FIX *it.*

Take fast. And make it faster. Take complex. And make it simple.  
Believe that no matter how well you do something, you can  
always do it better. And chances are you will.

At Expert Software Services, our goal is to create the benchmark. And keep raising it. Which is exactly the way we go about our business as a developer of multi-platform client/server systems. Reliable business solutions that are responsive to your organisation's unique way of doing things.

To deliver quality best-of-class solutions, we've formed strong strategic relationships with industry partners. Including our alliance with Microsoft — the world's largest software company. Our status as a Microsoft Certified Solution Provider Partner and our membership in the Oracle Business Alliance Programme is evidence of the industry recognition our efforts have received.

We've put in place specialists to handle a wider range of large, complex multi-tiered solutions.

We've devoted more people and resources to delivering state-of-the-art enterprise client/server solutions using Microsoft and Oracle products — including Windows NT, BackOffice, Transaction Server, SQL Server, Designer/2000 and Oracle8.

And that's in addition to our already strong team of expert professionals developing MVS, AS/400 and UNIX based solutions using Oracle, IMS, DB2, CICS etc.

What's more, we are providing everything from database management and mainframe legacy system maintenance to leading edge client/server and business process re-engineering solutions — including year 2000 problem resolution.

All in all, it's our total commitment to quality which is helping us to stay ahead of industry change and continue to deliver profitable business solutions for our customer partners.

Now we desire to be *your* solutions partner. And we'll do what it takes to achieve this goal with unwavering commitment.

So please call Expert Software Services today on 03 9320 6100. Or check us out online at <http://www.expert.com.au>. Because the best time to fix something is before it's broken.
