MAINFRAME

MVS, IMS, DB2, Oracle,
Adabas, COBOL, FOCUS

Expert Software Services designs, develops, installs and maintains a wide range of customised multi-platform software solutions for Australia's most prestigious corporate and government organisations.

Our primary focus is on developing enterprise client/server and workgroup applications using the full range of Microsoft and Oracle products as building blocks. We also build, enhance and maintain Mainframe and UNIX based systems. Plus we're heavily involved in developing state-of-the-art Internet/Intranet solutions.

Recruiting the Best

Recruiting the very best people to join Expert Software Services and providing them with ongoing training, development and career opportunities is a vital factor in our success. This is why we wish to continue our successful Graduate Training Programme in 1998.

Graduate Training Programme

If selected, you will undertake a two-year 'hands on' development programme preparing you for a professional technical or management position in our Melbourne office.

The programme will provide you with:

- | an exciting career in computer programming, system design/analysis and project management;
- | ongoing training for recognised industry qualifications (e.g. Microsoft Certified Solutions Developer);
- | a thorough understanding of the company culture, management methodologies, quality procedures and client relationship goals;
- | a challenging and meaningful role; and
- | programme guidance by senior management.

You will be a self-motivated potential leader who thrives on activity. Initiative and the ability to problem-solve and think on your feet to meet customer business needs are definite prerequisites.

Apply now by sending your resume detailing subjects studied plus a copy of your official transcripts of results, relevant experience and contact details to:

Graduate Training Programme
Expert Software Services Pty Ltd
2nd Floor • 607 St Kilda Road
