VEHICLE IDENTIFICATION NUMBERING SYSTEMS:

The Vehicle Identification Numbering System (V.I.N.) is based on the uniform Car Model Designation System. The reason for this is to identify the vehicle in one coded series of characters.

Two systems used through 'HQ' —

1st. System — 13 Characters

Effective:— Prior to 1st. October, 1972.

The significance of these characters or blocks of characters is explained below, using as an example identification number — 80169 Q H5 00025

1st to 5th Character	80169	Designates the Model. (Refer Model Designation Page).
1st Character	8	Standard Numeral allocated to GMH Limited.
2nd & 3rd Characters	01	Design Characteristic.
4th & 5th Characters	69	Standard Body Style Identification.
6th Character	Q	Last Letter of Vehicle Model Year in Letter Form.
7th & 8th Characters	H5	Australian Assembly Plant Identification Code.
9th to 13th Characters	00025	Sequence Number in which the Vehicle was built at the Plant concerned.

VEHICLE IDENTIFICATION NUMBERING SYSTEM (Cont'd.)

2nd (Revised) System — 14 Characters
Effective:— From 1st. October, 1972.

The significance of these characters or blocks of characters is explained below, using as an example identification number 8 N 69 R C J5 00025 Q.

1st Character	8	Standard Numeral allocated to GMH Limited.
2nd Character	N	Degree of Luxury:— M — Balmont, Chassis & Cab N — Kingswood, Monaro P — Premier, Monaro LS Q — Monaro GTS R — Statesman S — Statesman De Ville
3rd & 4th Characters	69	Standard Body Style Identification.
5th Character	R	Engine Identification Code. (Refer Engine Identification).
6th Character	C	Identifies Model Year. This Letter changes 1st September each year and relates to GM Internal Operations Only.
7th & 8th Characters	J5	Australian Assembly Plant Identification Code:— H1 thru H4 — Brisbane H5 thru H9 — Sydney J1 thru J9 — Melbourne L1 thru L5 — Adelaide L6 thru L9 — Perth
9th to 13th Character	00025	Sequential Production Serial. This designates the Serial Unit Number at each Vehicle Assembly Plant, starting at (0001); and to continue in Numerical Sequence regardless of vehicle type.
14th Character	Q	GMH Limited Model Code Designation for each Model Programme.

INTERIOR TRIM

All items of trim are identified by a part number consisting of a basic number which identifies the item and a suffix consisting of alphabetical symbols which denotes the colour, e.g.,

BASIC NO.	SUFFIX	COMPLETE NO.
2816657	BA	2816657 BA

To interpret trim requirements it is necessary to determine the model and trim number from the Body Identification Plate attached to the top ledge of the dash panel under the engine hood, also the type of seats, etc., fitted with the exception of door trims, seat cushions and back covers. Refer Model and Trim Combination Number to the following Trim Colour Charts to establish the specific colour name.

Trim Numbers will be allocated to identify trim colour only and will not indicate trim design requirements. The colour will be predicted by the colour of the vinyl used in seat construction.

Separate numbers will be allocated for vinyl and vinyl/cloth combinations.

The codes will consist of two (2) numeric characters and one alphabetical character.
