Get connected with hundreds of people on-line daily via PC Connection.
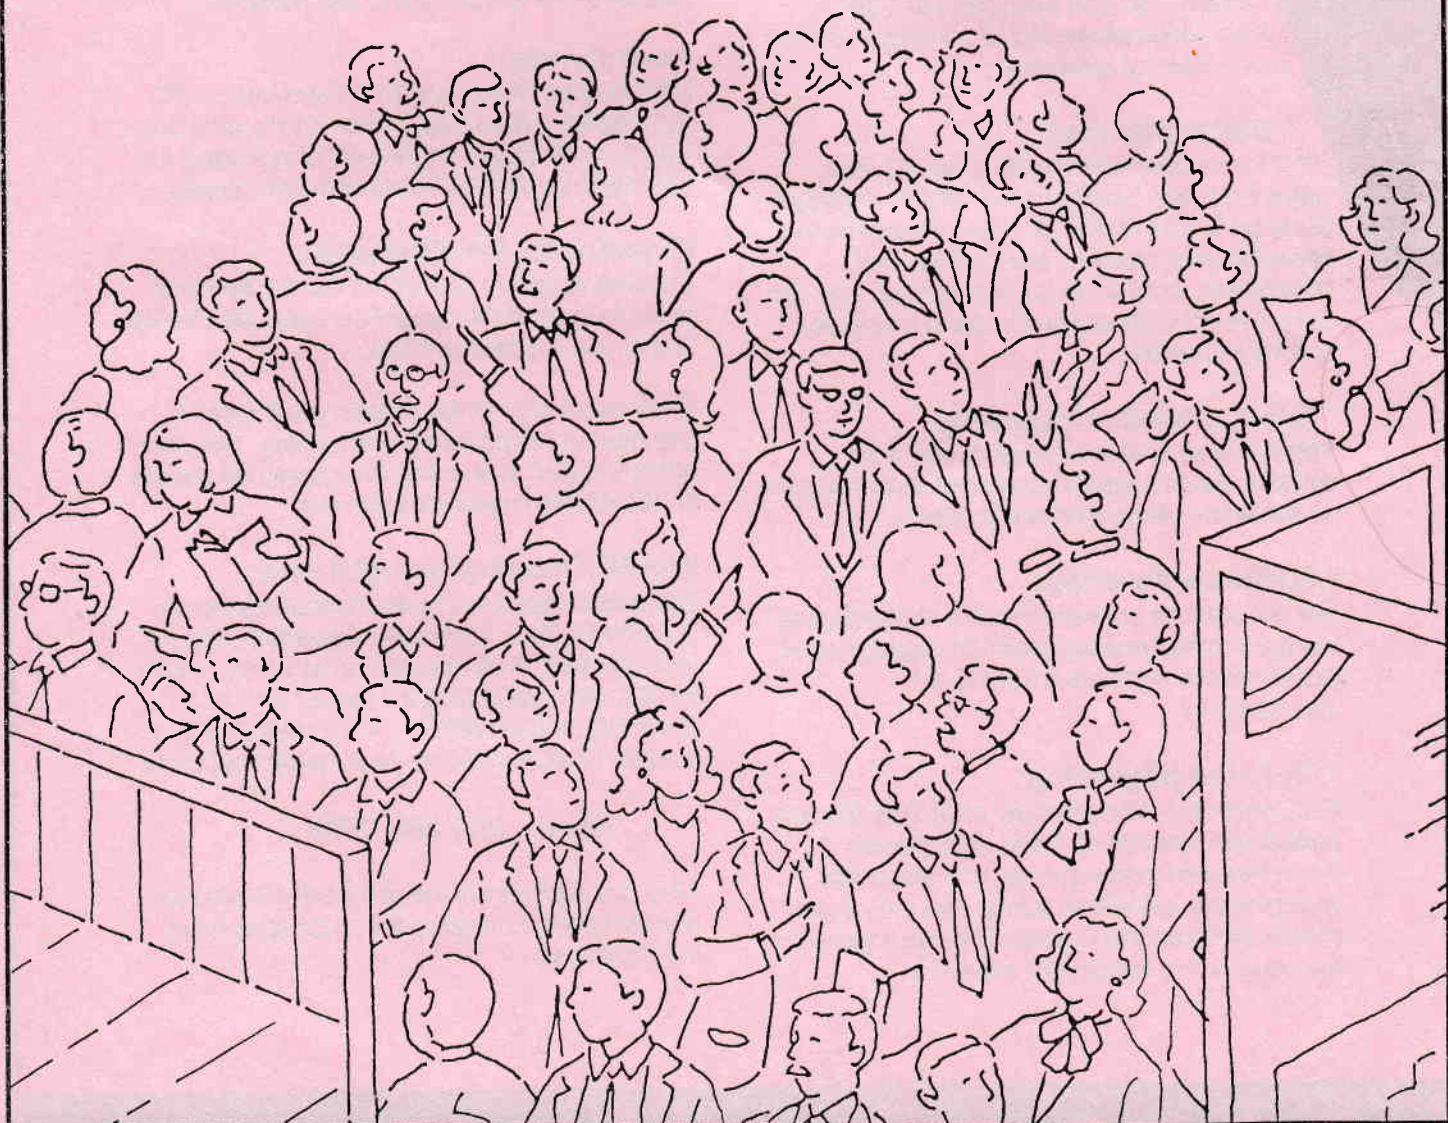

Seven great reasons to join PC Connection. The on-line service that connects you to others.

* Many useful microcomputer related conferences:

As a PC Connection user you are connected with experts on IBM PC and compatibles, Macintosh, Microbee, Amiga, and Unix machines (to name but a few). You can even join our OS/2 or LAN conferences and learn about the next generation of computing.

* Electronic mail:

PC Connection offers private user-to-user electronic mail. You can even attach a binary file to an E-mail message. Now you can send spreadsheets, pictures, word processing documents, or desktop publishing files. You can even use PC Connection E-mail to distribute software updates.

* On-line teleconferencing:

You can chat on-line to other users of the system. Get immediate responses to problems - or share your experiences with others.

* Software libraries:

We will soon be connecting a CD-ROM drive to the system and making over 500 megabytes of public domain software available for downloading!

* Only the beginning:

PC Connection also provides classified ads and polls & questionnaires. Soon multi-player adventure and action games, and an on-line shopping service will be added. We may even create an Electronic Casino! The more you use the service, the faster we'll expand it.

* Vendor support:

Already MicroHelp, Microbee and Powertech International are proving on-line support to customers via the service. We have approached a number of Australian distributors and expect many will soon be using PC Connection to support their products. Get answers about new releases and tips on how to use products.

* And it's FREE!

Until at least December '89 all services on PC Connection will be free. At that a time a decision will be made based on the cost of providing the service as to whether fees will be introduced.

Experience the difference:

Become a regular user of PC Connection and make full use of the current services, plus be the first to use the new services.

Even as a visitor to the system you'll receive one hour of restricted access per day. You may apply for "live" status and be granted full access to all facilities three hours per day!

Try PC Connection right now:

Set your computer's communications program (Procomm, Telix, Crosstalk, Supercom, etc...) for full duplex, 8-bit characters, no parity, 1 stop bit. Set the baud rate to the fastest of V.21 (300/300), V.23 (1200/75), V.22 (1200/1200) or V.22bis (2400/2400) that your modem supports.

Dial: (03) 388 0909

After you register on-line you get the main menu and you begin to explore the exciting world of PC Connection.
